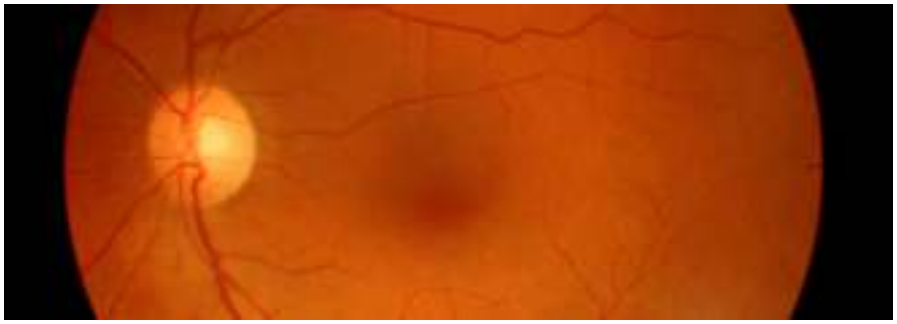
Wellness Retinal Imaging

The retina, or inner lining, of the eye is photographed with a specially designed camera through the pupil of the patient. The painless procedure produces a sharp view of the retina, the retinal vasculature, and the optic nerve head from which the retinal vessels enter the eye. This image is used to document conditions such as diabetic retinopathy, age related macular degeneration, glaucoma, macular edema and retinal detachment. This is especially helpful to document if you have a family history of these or other medical conditions.

The fee for this part of the eye exam is $39.

___ Yes, I want to have retinal photos taken of my eye for documentation.

___ No, I do not wish to have retinal photos taken.



Are you interested in contact lenses or currently wear contact lenses?

Are you interested in contact lenses or currently wear contact lenses, our doctors can discuss your options with you. Our recommendations are **individually** tailored to each patient and are based on many factors, including your glasses prescription, visual needs, overall health and eye health. Because of this, **if the contact lens prescription is not finalized within 30 days there will be 40.00 re-refraction/ trial lens fee added to the account.**

What is a contact lens fitting/re-fitting? *Contact lens fittings and re-fittings are* a **separate** part of a comprehensive eye examination and require additional testing. Patients hoping to wear contact lenses require more of the doctor's time and expertise. In order to prescribe contact lenses, an eye doctor must complete several additional tests: 1. Evaluate the health of the eye, paying close attention to the cornea, eyelids and conjunctiva and how contact lens wear will affect the health of the eye. 2. Determine the proper contact lens prescription based on each individual patient's glasses prescription, vision needs and corneal health and curvature. A contact lens prescription is different and separate from a glasses prescription. 3. Examine the contact lens on the eye to ensure proper alignment with the cornea and lids. 4. Measure the vision with the contact lenses on the eye and make adjustments as indicated. Contact lens examinations and fittings and refittings have different levels of difficulty, depending on the type of contact lenses needed, the visual requirements of the patient and the health of the patient's eyes.

Why is the contact lens fitting/re-fitting separate from the comprehensive eye examination fee? Most insurance companies require doctors to separate routine comprehensive eye examination fees from any services performed due to contact lenses. More time and testing are required for a patient who wears contact lenses (even with those who have a history of contact lens wear); therefore, most insurance companies consider contact lens services as additional and separate evaluations from the eye examination.

What is a contact lens prescription? Contact lenses are medical devices that can only be dispensed by a prescription. Contact lens prescriptions expire after **one year** (or sooner if the doctor determines a medical reason for a shorter expiration date). They must be regarded with the same caution you would use for prescription drugs, which include prescription expiration dates and follow-up visits with your eye doctor. Your contact lens prescription will include the power of your contact lenses, the type of contact lenses you wear, the shape of the contact lenses (curvature) and any other information determined by the doctor to be necessary for a proper contact lens fit. Your eyes go through gradual changes in size, shape and physiological requirements (such as need for moisture etc.) while wearing contact lenses. These changes can affect the health of the cornea and need to be monitored at least every year. The federal government requires contact lens prescriptions to expire after one year for these reasons.

What if I (or my dependant) is unable to wear contacts? Contact lenses are not for everyone. Sometimes due to eye health, or other extenuating circumstances someone is unable to wear contacts. The procedures and charges associated with contact lens fittings are not a guarantee that you (or your dependant) will be able to wear contacts as an optical Rx alternative. Despite this, you are responsible for the charges associated with any exam, fitting, and training involved in the contact process. By signing this you acknowledge that Eye-Q Optometry staff has provided you (or your dependant) with the best service and best resources at their disposal to help make wearing contacts a viable alternative to a glasses prescription, and you are responsible for paying for those services, despite the results

I have read the above; understand and agree with the office policy regarding contact lens fitting/re-fittings and related charges.

I am interested in contact lenses: _____

- **I have worn contact lenses: _____**
- **I have not worn contact lenses: _____**

I currently wear contact lenses and want my contact lens prescription renewed: _____

I currently wear contact lenses, I do not want to renew my contact lens rx at this time: _____

I am not interested in contact lenses: _____

Patient's Name:_____***D.O.B.***_____

We at Eye Q Optometry are committed to providing the highest level of professional medical care and personal service. By selecting our office you have expressed confidence in our ability to meet this commitment.

PAYMENT PROCEDURE

For every commitment there is an obligation. At Eye Q Optometry we are committed to providing quality eye care and service. Conversely, we feel it is the guardian/patient's responsibility to meet their financial obligation.

* As we see patients from many Insurance Plans, it is impossible for us to know all the covered benefits, co- pays and deductibles for each plan. While it is our intention to assist you, it is still your responsibility to insure that all services rendered by Eye Q Optometry on your behalf are paid in full within thirty (30) days of the statement date. In some instances Eye Q Optometry can not bill your insurance carrier for you. However, you will be provided with all of the information necessary to submit a claim to your insurance company.

* Payments made at the time of service may not represent payment in full for services which are rendered. Additional charges may be warranted once your claim has been submitted due to the complexity of physician services required for treatment.

* The patient's financial responsibility may include co-payments, co-insurance and services not approved or paid by your insurance carrier.

* Balances (after insurance billing) over 30 days old will receive a $10 late fee; every 30 days an account remains delinquent an additional $10 will be applied.

It is important that you bring proof of insurance each time you visit Eye Q Optometry. Failure to do so may mean that we do not have the most recent insurance information. Please make every effort to let us know if your insurance carrier (primary/secondary) or your personal information (address, employer, phone number(s)) has changed since your last visit.

* Incorrect Insurance information that results in re-billing will incur a $10 Rebilling fee.

AUTHORIZATION FOR RELEASE AND ASSIGNMENT OF BENEFITS

* I request that payment of authorized Medicare, Government and any other third party benefits made on my behalf and/or on behalf of all members covered on my insurance plan be made directly to Eye Q Optometry, Dr. Melody Quenzer for services furnished by that provider.
* I authorize the release of medical information about me needed to determine benefits or benefits payable to related services. I permit a copy of this authorization to be used in place of the original.
* Understanding that insurance information and coverage can be very confusing and complicated we are committed to helping you with any questions you may have. Please feel free to call our office and speak with Accounts Payable directly at (916)434-6225.

I have read and understand the policy stated above.
